

Firefighter Survival/ Firefighter Rescue

The Garfield County Training Consortium and the Carbondale Fire District present Chief Paul Capo of When Things Go Bad

Ask yourself, are you prepared to save a member who just suffered a heart attack while operating on a peaked roof? What about a firefighter who presents themselves in need at a window that is higher than your greatest ladder? Remember the time is NOW. We cannot wait for additional resources. Just because you checked a box that a rescue team (R.I.T.) is established does not mean it's as competent as it needs to be. When Things Go Bad teaches the latest and most practical ways to rescue firefighters in distress. By carrying the least amount of equipment with the greatest number of applications we become self-sufficient to rescue ourselves and other brother and sister firefighters.

- **Classroom:** Survival Size-Up, Proactive Tasks of the R.I.T., Tools and Equipment, Search Patterns, Assessment, Packaging, and Drags, Firefighter Extrication, Mayday! What it is and how to use it, Radio Communication, SCBA Emergencies, Reorientation Techniques, Self-Rescue/Bailout Techniques
- **Hands On:** Airway Series and packaging, Downed Firefighter Gauntlet, Nance Drill, Up/ Down Stairs, Bail Out and more.

August 22 + 23 0830 at the Carbondale Fire District

The lecture presentation (8/22) is open to all participants, the hands-on portion (8/23) will be limited to 24 train the trainer student/ instructors.

Sign up through your Training Officer by July 8th.
